

PANGA MARINE

THE 22' CAPTIVA

By Panga Marine | MSRP \$81,789

In the continuing effort to improve performance and satisfy our customers' desires, the Captiva was developed.

Every Panga Marine Captiva includes features to add comfort and ease of use and maintenance, including a 3 piece gunnel cap and liner, self-bailing deck, 316 stainless hardware and fasteners, all knitted hand laid fiberglass material, 100% no wood construction, core-mat for strength and improved cosmetics, powdercoating, and a transom made with ceramic pourable compound.

The new design gives our 22 foot hull unmatched performance in its class. Hull design changes give the boat a smoother ride and the ability to use a 200 HP motor, all while maintaining the efficiency and versatility our 22 is famous for.

When we are asked for a variety of options, the Captiva is perfectly suited for the task.

Increased power and performance led us to build a more robust hull, and as is true with all of our boats, it is 100% no-wood construction.
